Overview:

If you're looking for exceptional value and more options in your Construction Lasers... look to Topcon. Topcon's new RL-VH4 Laser Series lets you pick the tool that is best for your job and your budget.

Choices are Good

You can select from either a Red or GreenBeam® and either an Interior or General Construction model. All of the RL-VH4 Lasers are multi-purpose, accurate and durable.

Fastest Setup

These Lasers are made for fast setup time. The Electronic Self Leveling feature puts you a buttons push away from getting to work.

Easy to Use

Need a Laser that's easy to use? You can do Horizontal, Vertical or Plumb jobs and get the productivity boost you have come to expect from Topcon.

Excellent Return on Investment

The RL-VH4 Laser Series are ultimately designed and built for one thing... to make you more money! Contact your local Topcon representative and prove to yourself that these new lasers are the best choice for all of your projects.

Complete, dependable, durable, accurate, visible and affordable.

Now you have the power to work the way you always wanted to work!

The RL-VH4 Multi-Purpose Lasers offers you three power options for convenience and flexibility: Alkaline, rechargeable and AC run/charge.

The RL-VH4 Laser Series provides up to twice as many hours of operation from one set of alkaline batteries than other lasers. Four times more visible with the GreenBeam® version.

This is the power you need...

Increase your productivity with Topcon....

SmartScan®
